

Stamford Risk Analytics CEO to Deliver Keynote Address at GCOR IV Presenting A New Approach for Managing Operational Risk

January 12, 2010 – Stamford Risk Analytics (SRA) President and CEO, Ali Samad-Khan, a globally renowned risk management expert, will deliver a keynote address at the upcoming Global Conference on Operational Risk (GCOR IV) in Boston on March 17-18, 2010. Mr. Samad-Khan will be presenting “A New Approach for Managing Operational Risk – Addressing the Issues Underlying the Global Financial Crisis.” Mr. Samad-Khan was a primary author of a recently released report on the same topic, published by the Joint Risk Management Section of the Society of Actuaries, the Canadian Institute of Actuaries and the Casualty Actuarial Society.

Owing to the fact that operational failure has played a role in virtually every catastrophic financial loss that has taken place during the past 20 years and was also the underlying cause of the 2008 global financial crisis, Mr. Samad-Khan’s presentation will focus on the following key themes:

- Why does risk management need to be reinvented?
- What changes need to be made to our existing risk taxonomy?
- How should risk information be used in business decision analysis?
- What is principal-agent risk? Why must this risk be mitigated in order to prevent another financial crisis and how can this be accomplished?

With more than 13 years experience in risk management, Mr. Samad-Khan has been an authoritative speaker at numerous risk management conferences around the world. He has also served as an advisor to many of the world’s largest corporations,

multi-lateral institutions and national and international regulators. His provocative articles and white papers have served as a catalyst for change in the way many organizations manage risk.

GCOR IV is the fourth annual operational risk conference organized by the Risk Management Association (RMA). The RMA is a member-driven professional association whose purpose is to advance the use of sound risk principles in the financial services industry. More information on GCOR IV is available at www.rmahq.org.
